Objective

Motivated and enthusiastic student nearing graduation, seeking an entry-level Data Analyst role to apply my skills in data cleaning, preprocessing, and visualization using Python and Excel. Passionate about uncovering insights, supporting data-driven decisions, and contributing to team success in a dynamic organization. Committed to continuous learning and growth in data analytics.

Skills

Technical Skills: Python, SQL, Excel, Power BI, MongoDB

Soft Skills: Critical Thinking, Leadership, Team-Player

Education

St. Vincent Pallotti College of Engineering & Technology

Bachelor in CSE (Data Science)

- GPA: 7.78/10.00

Nagpur, Maharashtra

Graduation- June 2025

Vidarbha Buniyadi Junior College

Higher Secondary Certificate

- Percentage: 83.83/100

Nagpur, Maharashtra

Passed – March 2021

Shahu's Garden High School

Secondary School Certificate

- Percentage: 85.40/100

Nagpur, Maharashtra

Passed - March 2021

Work Experience

Data Analyst Intern, Primine Software Pvt. Ltd

Jan 2025 – Present

- **Inventory Management & Demand Forecasting:** Developing solutions to optimize inventory levels and predict demand trends for efficient resource management.
- **Flask Backend Development:** Implementing a robust backend using Flask to handle data processing and API integration.
- **SQL Database Management:** Managing and querying databases to store, retrieve, and analyze inventory and forecasting data effectively.

Data Science Intern, Academor

Sep 2023 – Oct 2023

- During my internship at academor I am learning and applying data science tools and technologies.
- Gained proficiency in Python, pandas, NumPy, and matplotlib.
- Worked on practical data science projects to apply learned concepts.
- Developed hands-on experience with data manipulation, analysis, and visualization. Enhanced problem-solving skills through real-world challenges.

Project Experience

Medical Image Synthesizer Using Machine Learning

June 2003 – Aug 2003

- Developed a Medical Image Synthesizer to generate synthetic medical images and address data scarcity.
- Collected and analyzed real-time medical data, performing EDA for insights and quality checks.
- Applied data augmentation to balance class distributions and improve model performance.
- Implemented ResNet-50 and VGG16 to evaluate image accuracy and model reliability.
- Leveraged deep learning and CNNs for synthetic data validation and analysis.

Student Performance Predictor Using Machine Learning

Feb 2024 – May 2024

- Developed a Student Performance Predictor to forecast student performance based on daily routines.
- Generated and analyzed a custom dataset, performing EDA for insights and model optimization.
- Implemented a Linear Regression model for accurate performance prediction.
- Designed and built a front-end interface with a secure login system.
- Utilized Flask for backend development, enabling seamless page routing.

Diwali Sales Analysis

Sep 2024 – Sep 2024

- Conducted analysis on Diwali sales data to identify high-performing sectors.
- Utilized pandas for data manipulation and matplotlib for visualizing trends, leading to actionable insights on customer behavior and sector performance.
- Key Skills: Data Analysis, Python, Data Visualization, Sales Trends Analysis.

Certifications

- SQL for beginners – Scaler
- Python for Data Science - NPTEL
- MongoDB Certificate – MSIT Services – CMS
- Python Certificate - ILearning
